

CUSTOMER SUCCESS CASE STUDY

HOW A GLOBAL SECURITY SOFTWARE COMPANY EXPANDED DIGITAL COMMERCE THROUGH RESELLERS AND MARKETPLACES

BUILDING A MULTI-SITE E-COMMERCE GROWTH MOTION THROUGH ONLINE RESELLERS, MARKETPLACE PARTNERSHIPS, SEO AND PAID DEMAND

Organisation	Global security software company
Period	February 2011 - February 2016
Role / scope	Manager - Online Marketing and Digital Sales E-commerce, partnerships and digital revenue
Audience	CMOs, marketing leaders, CEOs and hiring managers

EXECUTIVE OUTCOME

The work expanded the digital commerce footprint by onboarding 50+ online resellers and establishing business associations with major e-commerce marketplaces. It connected SEO, social media, online marketing, promotions and campaign optimisation. The supplied material documents 33% year-over-year growth in online sales and 1.8x digital-revenue growth for two consecutive years. The customer-success story is the creation of a broader distribution system rather than dependence on one direct channel.

METRIC REGISTER AND PUBLICATION STATUS

Each metric is either documented in the supplied profile/project material or marked as an illustrative validation item. Validation items are prompts for recovering the original baseline, denominator, source and attribution; they are not public claims.

Metric	Value	Definition	Status / publication note
Online resellers	50+	New online reseller relationships onboarded.	Documented in supplied profile material.
Online sales	+33% YoY	Year-over-year increase in online sales.	Documented outcome.
Digital revenue growth	1.8x for two years	Growth multiple in digital revenue over two consecutive years.	Documented outcome; confirm base and period.
Marketplace contribution	Validation required	Sales or revenue directly sourced through marketplace partnerships.	Illustrative validation item - not a claim.

BUSINESS CONTEXT AND CUSTOMER CHALLENGE

A security software portfolio needs reach where customers already shop. Direct e-commerce provides control, while marketplaces and reseller networks can expand distribution, trust and convenience. Each channel introduces complexity in pricing, listings, promotions, fulfilment and measurement.

The organisation needed to make digital commerce a larger and more reliable part of the business by expanding distribution while improving demand generation, SEO and online conversion.

STRATEGIC DIAGNOSIS

Digital growth was constrained by channel coverage. Potential customers might know the brand but not encounter the product in the place or format matching their buying behaviour.

Partnerships only create value when actively managed through communication, incentives, promotions, product updates and performance review.

CAMPAIGN SUCCESS MATRIX

The matrix makes the operating logic visible: business need, strategic move, execution system and success signal. It is deliberately designed for executive readers who want to understand how the work created a repeatable capability, not only a headline result.

Business need	Strategic move	Execution system	Success signal
Reach	expand where customers buy	Online resellers and marketplace relationships	50+ reseller additions
Demand	drive qualified online traffic	SEO, social, paid media and campaigns	Online sales +33% YoY
Partner performance	activate distribution relationships	Programs, incentives and business reviews	Healthier reseller contribution
Scale	make digital a core channel	Multi-site e-commerce and optimisation	1.8x digital-revenue growth

APPROACH AND EXECUTION

1. 1. EXPAND DISTRIBUTION

The first move was expand where customers buy. The strategy made products easier to discover and buy while preserving consistency across digital storefronts. Nikhil's role was to connect the commercial objective with the practical work required to deliver it. That meant making the problem explicit, choosing a workable intervention and ensuring that the team could see what would happen next. In a complex marketing environment, this clarity is valuable because it prevents activity from becoming disconnected from the outcome.

The second part was operational discipline. The strategy made products easier to discover and buy while preserving consistency across digital storefronts. The work was reviewed through the lens of reach, so

decisions could be made with context rather than by chasing an isolated channel metric. This helped preserve the customer experience while improving the organisation's ability to execute, learn and adapt.

This move also created a reusable lesson. 50+ reseller additions The result should be interpreted as evidence of the system working, not as proof that one tactic alone created every business outcome. That distinction makes the story more credible for senior readers and gives future teams a clearer way to reproduce the useful part of the work.

2. 2. CREATE DEMAND

The first move was drive qualified online traffic. Owned digital activity created demand for products where customers could purchase them. Nikhil's role was to connect the commercial objective with the practical work required to deliver it. That meant making the problem explicit, choosing a workable intervention and ensuring that the team could see what would happen next. In a complex marketing environment, this clarity is valuable because it prevents activity from becoming disconnected from the outcome.

The second part was operational discipline. Owned digital activity created demand for products where customers could purchase them. The work was reviewed through the lens of demand, so decisions could be made with context rather than by chasing an isolated channel metric. This helped preserve the customer experience while improving the organisation's ability to execute, learn and adapt.

This move also created a reusable lesson. Online sales +33% YoY The result should be interpreted as evidence of the system working, not as proof that one tactic alone created every business outcome. That distinction makes the story more credible for senior readers and gives future teams a clearer way to reproduce the useful part of the work.

3. 3. MANAGE PARTNERS

The first move was activate distribution relationships. Partners received support and reasons to participate, rather than existing only as names in a list. Nikhil's role was to connect the commercial objective with the practical work required to deliver it. That meant making the problem explicit, choosing a workable intervention and ensuring that the team could see what would happen next. In a complex marketing environment, this clarity is valuable because it prevents activity from becoming disconnected from the outcome.

The second part was operational discipline. Partners received support and reasons to participate, rather than existing only as names in a list. The work was reviewed through the lens of partner performance, so decisions could be made with context rather than by chasing an isolated channel metric. This helped preserve the customer experience while improving the organisation's ability to execute, learn and adapt.

This move also created a reusable lesson. Healthier reseller contribution The result should be interpreted as evidence of the system working, not as proof that one tactic alone created every business outcome. That distinction makes the story more credible for senior readers and gives future teams a clearer way to reproduce the useful part of the work.

4. 4. MEASURE THE PORTFOLIO

The first move was make digital a core channel. The broader result was read as a portfolio outcome, while marketplace-only contribution remained a validation item. Nikhil's role was to connect the commercial objective with the practical work required to deliver it. That meant making the problem explicit, choosing a workable intervention and ensuring that the team could see what would happen next. In a complex marketing environment, this clarity is valuable because it prevents activity from becoming disconnected from the outcome.

The second part was operational discipline. The broader result was read as a portfolio outcome, while marketplace-only contribution remained a validation item. The work was reviewed through the lens of scale, so decisions could be made with context rather than by chasing an isolated channel metric. This helped preserve the customer experience while improving the organisation's ability to execute, learn and adapt.

This move also created a reusable lesson. 1.8x digital-revenue growth The result should be interpreted as evidence of the system working, not as proof that one tactic alone created every business outcome. That distinction makes the story more credible for senior readers and gives future teams a clearer way to reproduce the useful part of the work.

MEASUREMENT, ATTRIBUTION AND OPERATING DISCIPLINE

Reseller count is an activity metric; online sales and digital-revenue growth are outcomes. The latter need a comparison period, currency, channel scope and treatment of promotions. Marketplace-only contribution should not be inferred.

A senior reader should be able to tell which evidence proves execution, which evidence proves engagement and which evidence proves commercial impact. The case therefore keeps metric definitions close to the story. Where the supplied material documents a practice-level or portfolio-level result, the narrative says so. Where a project-specific number is unavailable, the document names the recovery task instead of manufacturing precision.

BUSINESS IMPACT AND CUSTOMER-SUCCESS INTERPRETATION

The organisation gained broader digital distribution and a more connected e-commerce engine. Customers could discover and purchase through more online routes, while marketing helped create demand and improve performance.

The story demonstrates channel strategy, partner activation and performance management together. Digital commerce is an ecosystem involving resellers, marketplaces, content, paid media, SEO, promotions and customer experience.

WHAT THIS CASE DEMONSTRATES TO AN EXECUTIVE READER

- Distribution partnerships must be managed as active growth channels.
- Owned marketing and partner reach work best when the customer journey is coherent.
- Online sales growth should be reported separately from reseller activity and total digital revenue.
- Marketplace attribution should be verified.
