

CUSTOMER SUCCESS CASE STUDY

HOW A GLOBAL SUPPLY CHAIN CONSULTANCY BUILT AN EXECUTIVE ABM MOTION ACROSS 47 ACCOUNTS

Turning account selection, research and personalisation into a repeatable path to C-suite conversations

Organisation	Global supply chain consultancy
Period	September 2023 - April 2026
Role / scope	Senior Marketing Manager Global brand, demand generation and sales alignment
Audience	CMOs, marketing leaders, CEOs and hiring managers

EXECUTIVE OUTCOME

The work created a focused enterprise account-based marketing motion for Supply Chain and AI consulting. Instead of treating every organisation as an equally valuable prospect, the program introduced account prioritisation, buyer research, personalised messaging, coordinated content and sales follow-up. The documented outcome was a 47-account program that converted 20% of C-suite targets into meetings. The deeper customer-success value was a common operating rhythm between marketing and sales: both functions could see which accounts mattered, why they mattered and what action should happen next.

METRIC REGISTER AND PUBLICATION STATUS

Each metric is either documented in the supplied profile/project material or marked as an illustrative validation item. Validation items are prompts for recovering the original baseline, denominator, source and attribution; they are not public claims.

Metric	Value	Definition	Status / publication note
Priority accounts	47	Number of enterprise accounts included in the documented ABM program.	Documented in supplied project material.
C-suite conversion	20%	Share of targeted C-suite contacts converted into meetings; confirm denominator.	Documented outcome; confirm denominator and period.
ABM pipeline	Validation required	Pipeline, opportunity and revenue generated or influenced by the ABM motion.	Illustrative validation item - not a claim.

BUSINESS CONTEXT AND CUSTOMER CHALLENGE

Supply Chain transformation and AI consulting involve multiple stakeholders, high perceived risk, long consideration periods and a requirement for executive confidence. A broad campaign can generate attention, but attention alone does not create an enterprise conversation.

The customer challenge was therefore not simply lead volume. It was relevance, coordination and progression. Account teams needed useful context before outreach, while marketing needed to build assets around real business priorities rather than generic capability language.

STRATEGIC DIAGNOSIS

follow-up in individual inboxes. That made it hard to create an experience that felt designed for a specific executive.

The answer was to narrow the field and increase orchestration. A 47-account universe created a manageable unit of focus. Each account could be researched, prioritised and assigned a narrative before marketing and sales agreed on the next action.

CAMPAIGN SUCCESS MATRIX

The matrix makes the operating logic visible: business need, strategic move, execution system and success signal. It is deliberately designed for executive readers who want to understand how the work created a repeatable capability, not only a headline result.

Business need	Strategic move	Execution system	Success signal
Account focus	establish a finite enterprise account universe	Account research, tiering and stakeholder mapping	47 named accounts with clear ownership
Executive relevance	replace generic capability language	Account-specific narrative and content hooks	Higher-quality C-suite engagement
Sales alignment	make outreach timely and informed	Shared account briefs and coordinated follow-up	20% C-suite-to-meeting conversion
Progression	move beyond activity reporting	Account engagement reviews and next actions	Reusable ABM playbook

APPROACH AND EXECUTION

1. 1. ACCOUNT SELECTION AND PRIORITISATION

The first move was establish a finite enterprise account universe. The program defined a manageable set of accounts and considered fit, relevance, seniority and the possibility of creating a credible reason to engage. Nikhil's role was to connect the commercial objective with the practical work required to deliver it. That meant making the problem explicit, choosing a workable intervention and ensuring that the team could see what would happen next. In a complex marketing environment, this clarity is valuable because it prevents activity from becoming disconnected from the outcome.

The second part was operational discipline. The program defined a manageable set of accounts and considered fit, relevance, seniority and the possibility of creating a credible reason to engage. The work was reviewed through the lens of account focus, so decisions could be made with context rather than by chasing an isolated channel metric. This helped preserve the customer experience while improving the organisation's ability to execute, learn and adapt.

This move also created a reusable lesson. 47 named accounts with clear ownership The result should be interpreted as evidence of the system working, not as proof that one tactic alone created every business outcome. That distinction makes the story more credible for senior readers and gives future teams a clearer way to reproduce the useful part of the work.

2. 2. RESEARCH AND MESSAGE DESIGN

The first move was replace generic capability language. Public and internal information was translated into a usable account narrative covering business pressure, likely stakeholders, proof and conversation angle. Nikhil's role was to connect the commercial objective with the practical work required to deliver it. That meant making the problem explicit,

marketing environment, this clarity is valuable because it prevents activity from becoming disconnected from the outcome.

The second part was operational discipline. Public and internal information was translated into a usable account narrative covering business pressure, likely stakeholders, proof and conversation angle. The work was reviewed through the lens of executive relevance, so decisions could be made with context rather than by chasing an isolated channel metric. This helped preserve the customer experience while improving the organisation's ability to execute, learn and adapt.

This move also created a reusable lesson. Higher-quality C-suite engagement The result should be interpreted as evidence of the system working, not as proof that one tactic alone created every business outcome. That distinction makes the story more credible for senior readers and gives future teams a clearer way to reproduce the useful part of the work.

3. 3. INTEGRATED CONTENT AND OUTREACH

The first move was make outreach timely and informed. Personalised outreach, content and sales follow-up were designed as a sequence that earned attention before asking for a meeting. Nikhil's role was to connect the commercial objective with the practical work required to deliver it. That meant making the problem explicit, choosing a workable intervention and ensuring that the team could see what would happen next. In a complex marketing environment, this clarity is valuable because it prevents activity from becoming disconnected from the outcome.

The second part was operational discipline. Personalised outreach, content and sales follow-up were designed as a sequence that earned attention before asking for a meeting. The work was reviewed through the lens of sales alignment, so decisions could be made with context rather than by chasing an isolated channel metric. This helped preserve the customer experience while improving the organisation's ability to execute, learn and adapt.

This move also created a reusable lesson. 20% C-suite-to-meeting conversion The result should be interpreted as evidence of the system working, not as proof that one tactic alone created every business outcome. That distinction makes the story more credible for senior readers and gives future teams a clearer way to reproduce the useful part of the work.

4. 4. REVIEW AND LEARNING

The first move was move beyond activity reporting. Marketing and sales reviewed account response patterns and live-conversation learning so the motion could improve over time. Nikhil's role was to connect the commercial objective with the practical work required to deliver it. That meant making the problem explicit, choosing a workable intervention and ensuring that the team could see what would happen next. In a complex marketing environment, this clarity is valuable because it prevents activity from becoming disconnected from the outcome.

The second part was operational discipline. Marketing and sales reviewed account response patterns and live-conversation learning so the motion could improve over time. The work was reviewed through the lens of progression, so decisions could be made with context rather than by chasing an isolated channel metric. This helped preserve the customer experience while improving the organisation's ability to execute, learn and adapt.

system working, not as proof that one tactic alone created every business outcome. That distinction makes the story more credible for senior readers and gives future teams a clearer way to reproduce the useful part of the work.

MEASUREMENT, ATTRIBUTION AND OPERATING DISCIPLINE

The primary metric is C-suite target-to-meeting conversion: the number of targeted C-suite contacts who accepted or attended a meeting divided by the agreed target-contact denominator within the program period. The 20% outcome is documented, but the denominator and meeting definition should be confirmed.

A senior reader should be able to tell which evidence proves execution, which evidence proves engagement and which evidence proves commercial impact. The case therefore keeps metric definitions close to the story. Where the supplied material documents a practice-level or portfolio-level result, the narrative says so. Where a project-specific number is unavailable, the document names the recovery task instead of manufacturing precision.

BUSINESS IMPACT AND CUSTOMER-SUCCESS INTERPRETATION

The campaign changed the quality of demand generation. It gave marketing a sharper definition of the audience and sales a stronger reason to engage. The 47-account scope made it possible to invest in account intelligence without creating an unmanageable burden.

From a customer-success perspective, the customer was the internal commercial team. Their success was not merely receiving more leads; it was receiving a more usable path into strategic conversations. The 20% result matters because it demonstrates movement from targeting to executive engagement.

WHAT THIS CASE DEMONSTRATES TO AN EXECUTIVE READER

- ABM becomes credible when the account universe is narrow enough to support real research.
- Personalisation should improve business relevance, not merely change a field in a template.
- Marketing and sales need a shared account-review rhythm.
- Executive engagement should be read alongside pipeline progression.
